

## The 6000 Exec air purifier

### Large scale gas and odor abatement

22 to 36 lbs. of activated carbon filtration  
to deal with large scale gas and odor problems.

Any HEPA air cleaner will trap solids but what about **gases and odors**?  
You need **carbon** for that. Not just a few ounces but pounds of it!

Only...  
The **AllerAir™** Mass Activated Carbon Bed MAC-B filtering system  
can eliminate noxious gases and odors from the air you breathe.

### The AllerAir 6000Exec features

- Cleanable pre-filter to collect larger particles.
- 22 to 36 lbs. mass activated carbon bed MAC-B filter that adsorbs noxious gases and odors.
- HEPA filter to trap 99.97% of solid particles as small as 0.3 microns.
- 2 anti-microbial filters.
- All metal construction to avoid plastic vapors.
- 400 CFM 3 speed fan.
- Cylindrical shape to maximize air flow.

### An excellent choice

For large homes, basements, big lofts,  
offices, commerces, mid-sized warehouses,  
and light industry.

- Effective up to 1800 sq. ft.
- Changes the air every 30 minutes.
- Excellent for a central air system.
- Positive and negative air attachments available.
- Vocarb and UV versions available.
- 5 year guarantee. (extendible to 10 years)

The 6000 Exec  
18 to 35 lbs. of activated carbon,  
combined with true HEPA

Protect yourself from noxious gases and odors as well as particles  
with the **AllerAir 6000 Exec**

# AllerAir™ 6000 air cleaner

## Large scale gas and odor abatement

*Our bodies do have some defenses against particles but none against gases and odors.*

*Most domestic air cleaners on the market only really protect against particles. They only have a few grams of carbon sprayed on a mesh for gases and odors. It's not enough.*

*Activated charcoal is the filter material used in military gas masks.*

*AllerAir air cleaners are used in hospitals, dental clinics, laser eye surgeries.*

*Invest in a real air cleaner: preserve your health and save on expensive medicines.*

*Chemicals have replaced bacteria and viruses as the main threat to human health in western industrial nations.*

*Rick Irvin Professor of toxicology at Texas A and M University.*

### **22 to 36 lb. MAC-B carbon filter bed**

- *Mass Activated Carbon can trap 60% of its own weight of noxious gases and odors.*
- *The more carbon you have the more pollutants will be trapped.*
- *The AllerAir 6000 Exec is designed for large scale gas and odor abatement*
- *Its MAC-B carbon filter can be ordered with 22 to 36 lbs of activated carbon*

### **HEPA filter**

- *Traps airborne particles such as dust mites, pollen, mold spores and animal dander.*
- *A HEPA filter can trap 99.97% of particles as small as 0.3 microns. That's the size of some bacteria.*

### **A cleanable pre-filter**

- *Stops larger material such as lint or paper from reaching the particle and gas and odor filters.*

### **2 anti-microbial filters**

- *Inhibit the growth of bacteria and viruses.*

### **Metal housing with baked enamel finish**

- *Plastic casing air cleaners can be cheaper, but plastic gives off vapors back into the indoor air.*

### **Cylindrical shape maximizes air flow**

- *The air flows in from the bottom through the 4 filters and circulates out through the top of the unit in the chosen direction.*
- *The outflow of clean air is separated from the inflow by the height of the cleaner. This avoids any mixing.*

### **Effective up to 1800 square feet**

- *Large enough to clean the air in a large living area or workspace.*
- *Three speed motor for rapid area cleaning or quiet overnight use.*

***A powerful air cleaning system that removes noxious gases and odors as well as particles from the air you breathe***
